# MAKING DOLLARS AND SENSE OUT OF YOUR ESG STRATEGY

## Achieve emission targets AND improve the bottom line.

Whether upgrading your equipment or investing in new, Waukesha's VHP Series Five engine offering is among one of the best low carbon options, reducing site CO<sub>2</sub>e by up to 50 percent to help meet environmental regulations while also reducing total cost of ownership.

With a power range of 1500 to 2500 bhp, Waukesha's Series Five engines are built to work with improved fuel efficiency and fuel flexibility plus 30% longer service intervals all backed with Waukesha's ESM2 control system, integrated with an easy-to-use e-Help troubleshooting feature and myPlant asset performance management tool to help keep your engines running longer. Incentives may be available to partially or fully subsidize your investments.
